

CITY OF SALISBURY

City of Salisbury in South Australia has been investing in its City Centre, with recent revitalisation efforts along major corridors of community and business activity, namely Church and John Streets.

As part of building landscape enhancements, footpath build-outs and better pedestrian connections, Council has also invested in a suite of digital infrastructure services to support this revitalisation. Best in class LED street lighting, public WiFi and CCTV are included in the deployment of multifunction poles that offer new capability, and the flexibility to be upgraded as the needs of the City Centre evolve.
